

SURYA TEJA PIDAKALA

(813)-860-1927 | suryateja.9902@gmail.com

SUMMARY

- Senior Data Analyst with 5+ years of experience delivering data solutions across financial and subscription platforms, with strong domain expertise in user behavior analytics, churn analysis, and subscription metrics.
 - Expert in SQL, Python, and data visualization tools like Looker, Tableau, and Power BI; adept at transforming complex datasets into clear, actionable business insights.
 - Proven ability to partner cross-functionally with product, engineering, and marketing to track user engagement, optimize campaign impact, and evaluate A/B testing strategies.
 - Highly skilled in working with event-based tracking systems, conducting feature performance reviews, and building end-to-end dashboards that drive product growth and retention.
 - Focused, adaptable, and collaborative with a passion for consumer behavior and data-led innovation.
-

SKILLS

SQL, Python, Looker, Tableau, Power BI, Subscription Analytics, ARPU, LTV, MAU, Churn Analysis, A/B Testing, Customer Segmentation, Data Visualization, Feature Usage Metrics, B2C Product Insights, Behavioral Analytics, Campaign Reporting, Statistical Methods, Data QA, Experimentation Frameworks

PROFESSIONAL EXPERIENCE

Senior Data Analyst | Arlo – Milpitas, California-USA | Dec 2025 – Present

- Driving advanced SQL-based data analysis and experimentation to generate actionable insights aligned with business and growth metrics, supporting data-driven decision-making across product and marketing teams.
- Designed and maintained Tableau dashboards to visualize KPIs, performance trends, and strategic metrics, enabling leadership to monitor growth, customer behavior, and operational efficiency.
- Built and optimized large-scale data pipelines using Databricks, performing data transformations, quality checks, and analytics at scale to support reporting and experimentation workflows.
- Integrated and analyzed data from Amplitude and SFMC to evaluate user behavior, subscription growth, and marketing effectiveness, translating insights into measurable business outcomes.
- Followed enterprise analytics best practices by managing workflows in JIRA and Confluence, participating in sprint reviews, peer code reviews, and ensuring data accuracy through validation and QA processes.

Senior Data Analyst | WisenIT – Remote-USA | June 2025 – Nov 2025

Developed predictive analytics pipelines using Python and R to identify user churn patterns across financial transactions, increasing customer retention by optimizing product nudges.

- Designed advanced Looker dashboards and forecasting models in Snowflake to deliver KPI performance insights to marketing and leadership teams.
- Executed A/B testing frameworks across customer cohorts to measure feature performance, leading to a 20% increase in conversion on key product features.
- Built customer segmentation models using unsupervised ML techniques in Databricks, supporting personalized engagement strategies and product recommendations.
- Implemented robust data quality checks and dbt-based modeling layers to ensure data integrity across AML and transactional datasets.
- Collaborated with Engineering, Product, and Customer Success teams to design analytics that reduced support response time and increased user satisfaction KPIs.

Senior Data Analyst | Capital One – Remote-USA | Jan 2025 – Apr 2025

Led analysis of user behavior across Capital One's digital credit products to track subscription performance, engagement patterns, and churn indicators.

Built and maintained dashboards using Looker and SQL to track KPIs including MAU, LTV, ARPU, and churn rates for premium service subscribers.

Partnered with product managers to execute and evaluate A/B tests, driving a 9% uplift in feature engagement and upsell conversions.

Collaborated with marketing to assess lifecycle campaign impact, providing data-driven insights that guided personalization strategies.

Supported instrumentation improvements by partnering with data engineering to refine event tracking schemas and QA pipelines.

Presented key findings to business stakeholders, translating complex data into stories that influenced roadmap decisions.

Data Analyst | Gana IT INC – Tampa, FL | Aug 2023 – Dec 2024

Designed and deployed financial performance dashboards in Tableau and Power BI to monitor user activity, revenue trends, and churn behavior across banking service tiers.

Built SQL models to calculate customer lifetime value, segment cohorts by subscription plan, and optimize customer journey metrics.

Supported feature rollouts and evaluated their impact using A/B testing and pre-post analysis for risk mitigation and pricing changes.

Conducted deep dive analysis on subscription drop-offs and helped recover nearly 15% of at-risk users through targeted re-engagement strategies.

Partnered with finance and marketing teams to align reporting views with business KPIs and promotional cycles.

Collaborated on weekly reporting cycles, ensuring accurate delivery of event-based user insights and continuous metric improvement.

Data Analyst | Salesforce (TCS) – Hyderabad, India | Jun 2020 – Jul 2022

Developed data pipelines and dashboards in Tableau and Presto to analyze user behavior, engagement, and feature adoption across partner tools.

Built event tracking pipelines using Spark, Hive, and Airflow, ensuring reliable capture of clickstream and interaction-level data.

Created reusable SQL models to compute KPIs like MAU, feature retention, and engagement decay curves.

Collaborated with regional marketing teams to evaluate campaign effectiveness across digital touchpoints.

Conducted QA of product analytics events and implemented validations for funnel performance metrics.

Partnered with product and analytics leads to optimize experimentation frameworks and metric consistency.

EDUCATION

Master of Science, Business Analytics and Information Systems | University of South Florida – Tampa, FL

Graduation: Dec 2023 | GPA: 3.84

Bachelor of Technology, Computer Science | JNTU – Hyderabad, India

Graduation: May 2020 | GPA: 3.81
